

MS-Graessner GmbH & Co. KG

THE GEAR COMPANY

POWER **GEAR**^{HS}

The HighSpeed bevel gearbox

Nothing but highlights!

POWER GEAR^{HS}

Designed for special requirements – no adaption, no compromises: There are decades of engineering expertise of MS-Graessner in the newly developed PowerGear^{HS} series.

Thus each individual component was consistently developed and designed to meet the requirements at the highest speeds. With a multitude of benefits for a variety of applications and fields of application. In short, a bevel gearbox like no other.

- Gearbox for highest speeds
- for dynamic servo drive-train units
- higher permissible thermal performance limit
- low backlash and high transmission accuracy
- Motor mounting via coupling and lantern
- friction-locked shaft-and-bevel-gear-fit
- suitable as pre-stage for coaxial gearboxes
- energy-saving due to high efficiency rating of 98%

Optimized Gleason gearing for highest speeds

Non-wearing torque transmission through friction-locked shaft-and-bevel-gear-fit

Optimized Gleason Gearing for highest speeds

Configurations	L, H, KL, KH
Shaft arrangement	WA 1, WA 3, WA 13, WA 12, WA 23, WA 123
Sizes	S75, S90, S110, S140, S170
Ratios	$i = 1.0 / 1.5 / 2.0$
Input speed	up to 8500 min^{-1}
Motor mounting	via coupling and lantern (KL/KH)

Options
<ul style="list-style-type: none"> ■ additional cooling: oil circulation system for cooling, cooling packs with or without additional fan ■ extended output hollow shaft for shrink disc (with or without shrink disc) ■ customized designs ■ mounting feet ■ also available in stainless steel

Configuration KL
 Input with coupling and lantern.
 Output with solid shaft on both sides or on one side.

Configuration L
 Input and output with solid shaft.
 Output on both sides or on one side.

Configuration KH
 Input with coupling and lantern.
 Output with hollow shaft and feather key groove.

Configuration H
 Input with solid shaft.
 Output with hollow shaft and feather key groove.

Performance table HS-Version

POWER GEAR^{HS}

	Abbr	Unit	S75	S90	S110	S140	S170

Weight approx.		m	kg	3.9	4.5	8.0	13.0	22.0
Service life		L _n	h	>15000	>15000	>15000	>15000	>15000
Lubrication	Synthetic oil ISO VG 150							
Average oil quantity			l	0.1	0.2	0.3	0.4	1.0
Operating temperature			°C	-30 to 100				
Paint	Primer RAL 9005 - dull black							
Mass moments of inertia ⑦ related to input	i=1.0:1	I ₁	kgcm ²	0.73	1.33	3.88	9.26	31.6
	i=1.5:1	I ₁	kgcm ²	0.49	0.95	2.88	6.31	19.6
for shaft arrangement WA 13	i=2.0:1	I ₁	kgcm ²	0.38	0.77	2.38	4.60	13.8

Ex-protection: Explosion-proof gearboxes available on request

Type of protection: IP 64

① Design K: permissible torque depends on selected coupling

② Max. 1000 cycles per hour, otherwise please contact us

③ Max. 1000 times during the service life of the gearbox

④ Observe permissible operating temperatures

⑤ Assuming 2% load and max. 10 Nm at the output

⑥ Point of force application center of shaft at an output speed of n = 400 min⁻¹

⑦ Design K: without mass moments of inertia of coupling

As a function of the thermal power limit, higher speeds at a reduced torque are possible.

For an optimal design of your application, please contact us.

BEVEL GEAR

Spiral, Hypoid and Zerol Bevel Gears

- Standard range of products and custom-made versions
- Module ms from 0.5 to 12
- Diameters up to 410 mm
- Shaft angles from 10° to 170°
- More than 60 years of experience
- In-house gearing calculations
- We manufacture to your drawing or advise you of possible alternatives
- Milled or ground gear tooth cutting

POWER GEAR

The high performance bevel gearbox

- High torque, small size
- For highest input speeds
- Ratios from $i = 1:1$ to $5:1$
- Torques up to 7000 Nm
- Output via solid and hollow shaft
- Motor mounting either directly or via coupling and lantern
- Variable ratios and uniform dimensions

DYNA GEAR

The highly dynamic servo right angle gearbox

- Hypoid gearing
- High input speeds at medium to high torques
- Ratios single-stage $i = 3:1$ to $30:1$
- Ratios, two-stage, up to $150:1$
- Torques up to 1440 Nm
- Flexible motor mounting via coupling and lantern
- Low backlash < 2 arcmin
- Variable ratios and uniform dimensions

DYNA GEAR^{Economy}

The cost-effective servo right angle gearbox

- Hypoid gearing
- High input speeds at medium torques
- Ratios single-stage $i = 5:1, 8:1, 10:1$ and $15:1$
- Torques up to 260 Nm
- Flexible motor mounting via coupling and flange
- Backlash < 6 arcmin
- Variable ratios and uniform dimensions

DESIGN GEAR

The customised gearbox

- Single-stage gearbox available as gear-change or reversing gearbox
- Forced oil circulation lubrication system gearbox for high speeds and torques
- Labyrinth sealed gearbox with an efficiency of $> 99\%$
- Special gearbox with additional functional elements
- Endless possibilities on request

KS TWIN GEAR

The bevel helical gearbox

- Two-stage bevel helical gearbox with ratios of up to $75:1$
- Torques up to 7500 Nm
- Torsional backlash < 6 arcmin
- Compact design
- Motor mounting either directly or via coupling and lantern
- High torsional stiffness
- High input speeds at high torques
- Variable ratios and uniform dimensions
